Amazing style! Graphics here are top tier. The music was ok but it's really short so get's annoying really fast. Gameplay is sadly boring, most of the time I just mashed the spacebar during fights without looking at the dices or cards because it is pure... luck. Oh an the humor is amazing too.

Yeah the gameplay is boring sadly, we decided to focus on the story too much and we left the mechanics last, it was our first game jam though, so we hope we will improve in the upcoming jams and focus much more on the gameplay

I like art and pink palette, but pls dont scale or rotate sprites. it kills such a beautiful pixel art

and btw: dont bet your wives, guys

The graphics were incredible. The gambling was hilariously unlucky. I did get stuck though. The cat said he would give me something for 100 credits or lose it all and I would get it for free, but I couldn't figure out how to redeem that, was I suppose to literally buy something off of him for 100 credits?

The art and personality of this game made me laugh, very charming! You also put an impressive amount of games and systems in place! I didn't fully understand the combat but it was quite visually pleasing. I can't believe you got working slots, roulette (with funny animation), and blackjack ai going. Awesome!

Despre Creativitate

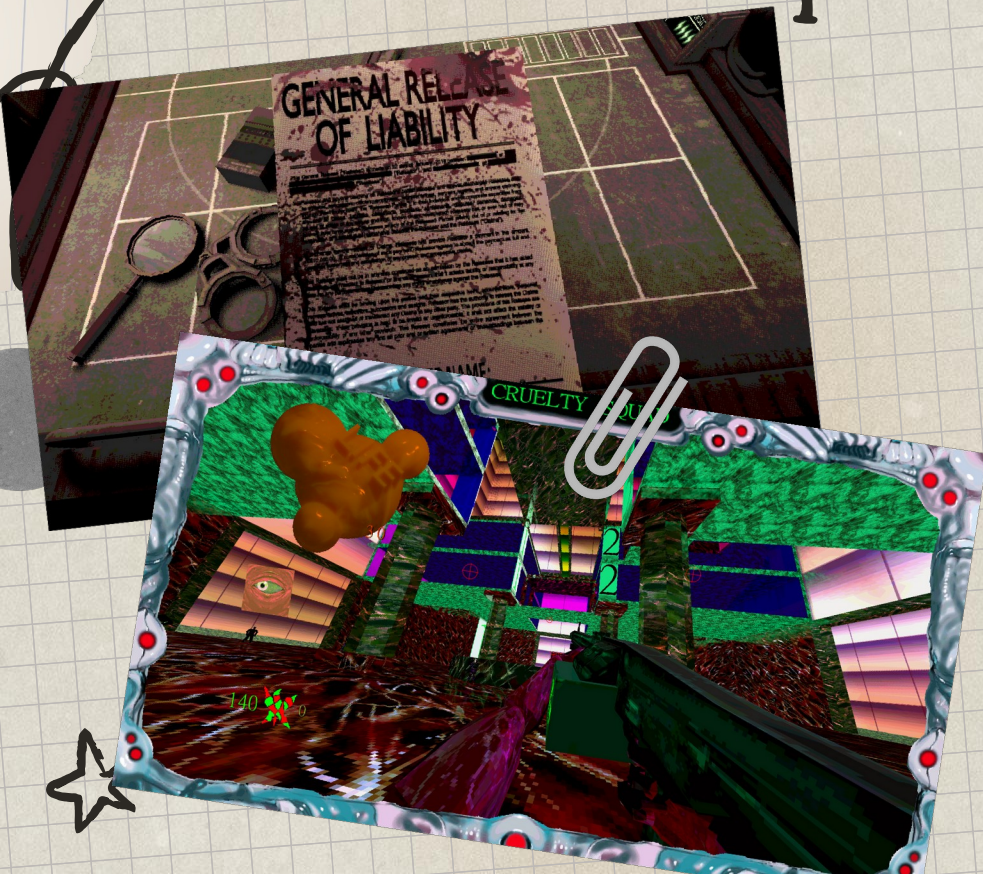

De ce este importanta creativitatea?

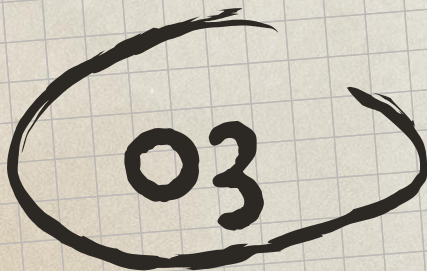

In game dev?

- Programarea si creativitatea merg **mana in mana**
- Jocuri **memorabile** -> idei **originale**
- Assets -> definesc atmosfera jocului
- Design-ul vizual influenteaza **experienta jucatorului**
- **Identitate vizuala**

Este important sa fim creativi, chiar si in domenii mai tehnice...

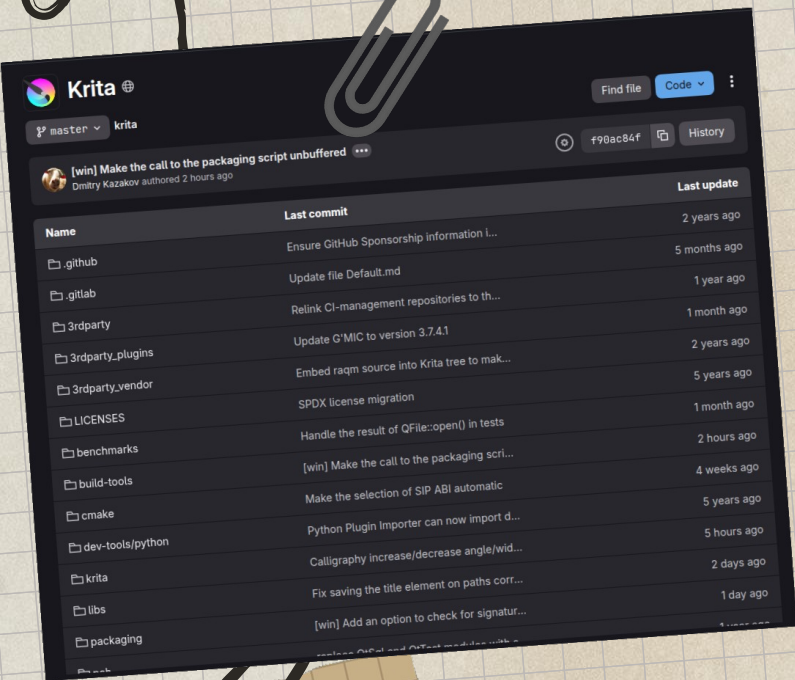

Open Source Software

Arta de a detine ceea ce creezi

Ce este o aplicatie 'open source'?

“Reteta publica”, cod sursa **gratis**, disponibil **public** si **modificabil**.

- Incurajeaza colaborarea
- ‘De la egal la egal’
- Planuri + documentatie disponibile gratuit

Exemple: **LibreSprite** (pixel), **Krita** (desen grafic), **Blender** (modelaj 3D), **Inkscape** (vectori), **GIMP** (Photoshop dar open source), **LibreCAD** (desen tehnic) etc.

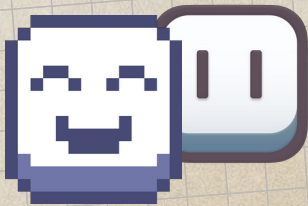

04

Aplicatii

In ce aplicatii lucram?

LibreSprite/Aseprite

Pixel Art, Animatii
etc.

Krita

Pixel Art, Desen
Grafic 2D,
Animatii, etc.

Blender (pe final)

Modelare 3D...

Dar aveti multe alternative...

Aplicatii PC Pixel Art:

LibreSprite/Aseprite

Piskel (Web)

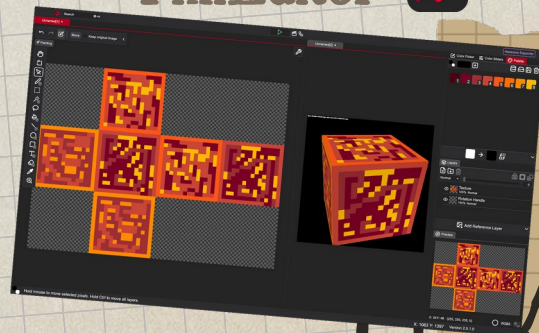

Pixelorama

Krita

PixiEditor

Aplicatii Android Pixel Art:

LibreSprite
(Android Port)

Pixelorama
(Android Port + Web)

Piskel (Web)

Krita (Android Port)

Pixelc (App Store)

iOS:

Pixelinoo

+ aplicatiile web mentionate...

De ce incepem cu Libresprite?

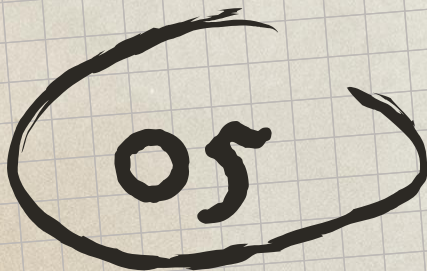

Licenta
'**proprietary**' =
Opusul '**open-**
source'

Este mai usor sa incepem cu pixel art + este un software mult mai simplu (in comparatie cu Krita sau Pixelorama)

Cat despre detalii tehnice...

- In 2016, **Aseprite** a trecut din licenta '**open source**' la licenta '**proprietary**'.
- Libresprite a luat **ultima versiune** '**open source**' de Aseprite, si a continuat sa o dezvolte.

Demonstratie instalare
Libresprite (PC),
Libresprite + Pixelorama
(Android)...

De unde ne inspiram?

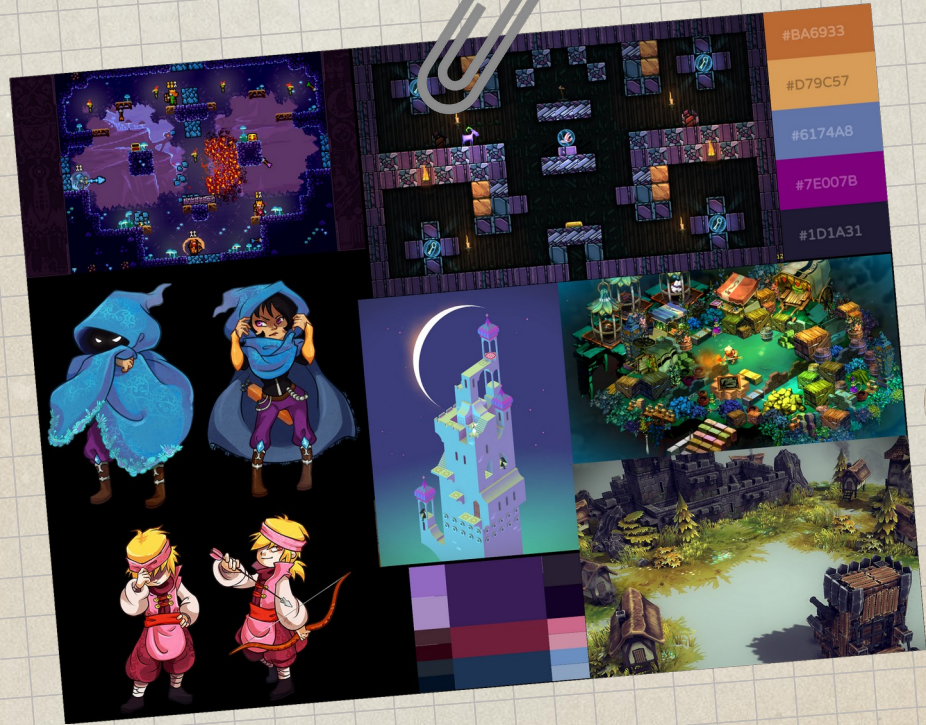

I. MOODBOARD

Ce este un 'Moodboard'?

Este '**panoul de inspiratie**' folosit in arta si design pt. a arata stilul, atmosfera si **directia vizuala a unui proiect**.

La ce ajuta?

- Organizeaza ideile vizuale
- Clarifica stilul proiectului
- Clarifica directia artistica
- Oferă **inspiratie**

I. MOODBOARD

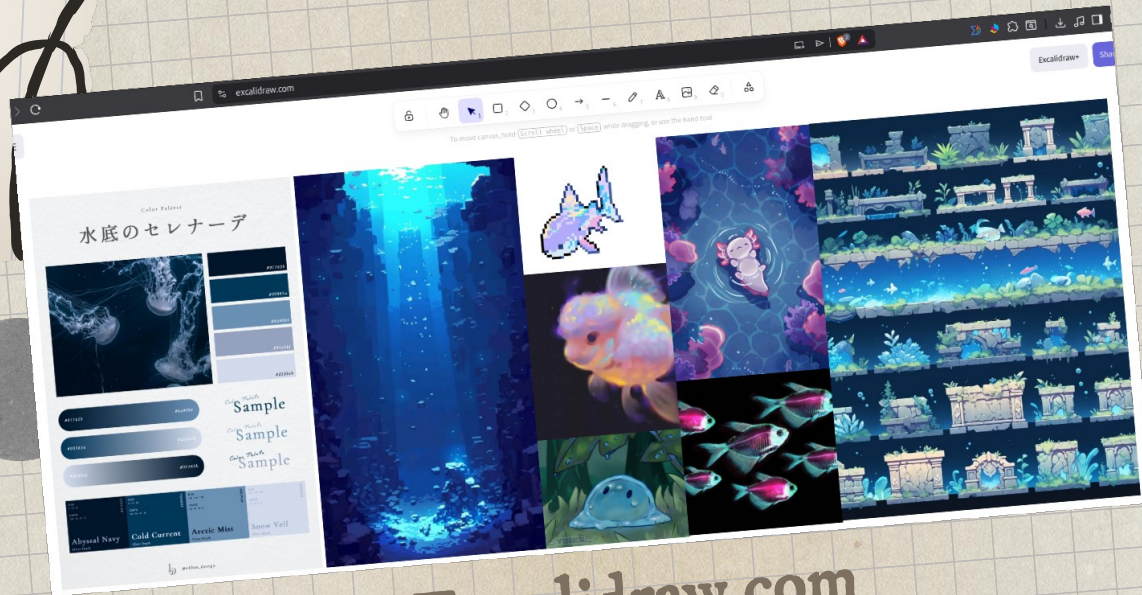

Cum facem unul?

In general, este doar o **colectie de imagini** care reprezinta un concept, proiect etc.

Pentru un **Game Design Moodboard** ar fi bine sa includeti...

- Paleta de culori
- Stilul de desen
- Imagini/elemente relevante jocului
